DETAILED ACTION

Drawings

The application having been allowed, formal drawings are required in response to this Office Action.

Allowable Subject Matter

Claim 8 is allowed.

The following is an examiner's statement of reasons for allowance: the overall claimed combination of a feminine hygiene article comprising a base panel, an upstanding member having a length at a top side of the member that is approximately twice as long as a width of the member, a sealing member, and an adhesive member wherein the perimeter of the base panel lies generally in a plane and portions of the base panel lateral to the upstanding member curve upwardly such that an uppermost top of the upstanding member lies generally in the plane of the perimeter and a height, being defined between the bottom surface of the base panel and the uppermost tip of the upstanding member, is approximately one-quarter of a width wherein the width is defined between opposite points on the perimeter has neither been rendered obvious nor anticipated by the prior art of record. The examiner originally stated that the limitations with respect to the height would be obvious matters of design choice. However, the applicant has presented persuasive arguments stating that claimed limitation of base panel lying in a plane in combination with the concave/convex top and bottom surfaces creates a continuous barrier which provides added leakage protection.
